

NEHANTH C

Network Engineer with Linux Platform

✉ nehanth20042828@gmail.com | ☎ 6380030638 | 🔗 <https://nehanthc.github.io/nehanth>

CAREER OBJECTIVE

Motivated and detail-oriented Computer Science Engineering graduate with strong interest in Networking, Cybersecurity, Linux Administration, and Network Automation. Skilled in routing & switching, network security, and troubleshooting with hands-on experience in Python-based networking projects and modern web technologies. Seeking an opportunity to contribute technical skills, problem-solving abilities, and continuous learning mindset in a challenging Network Engineer role.

EDUCATION

Bachelor of Engineering – Computer Science 2022 – 2026

Excel Engineering College, Anna University | Namakkal, Tamil Nadu

CGPA: 8.0 / 10.0

Higher Secondary (12th) – Computer Science 2021 – 2022

Veludayar Higher Secondary School | Thiruvavur, Tamil Nadu

Percentage: 72%

CERTIFICATIONS

- Cisco – Building and Securing Production Services in Cloud Workshop (NIT)
- Getting Started with Enterprise Data Science (IBM)
- Internship - AutoCAD (SKILL INTERN)
- Common internship test completed (INTERSHIP STUDIO) CIT-P-1551898

TECHNICAL SKILLS

Routing & Switching	RIP, OSPF, EIGRP, VLANs, Inter-VLAN Routing
Network Protocols	TCP/IP, UDP, HTTP/S, DNS, DHCP, FTP, NAT/PAT
Hardware	Cisco Routers & Switches, Firewalls
Network Security	Firewall Rules, Port Security
Tools & Software	Nmap, Wireshark
OS & Platforms	Linux (Arch+ Hyprland) Administration
Cloud Basics	AWS

ACADEMIC PROJECTS

Smart Expense Tracker With Diary

Developed a desktop/mobile-based Smart Expense Tracker application integrated with a Personal AI Diary system using Python and KivyMD. The application allows users to manage daily income and expenses, categorize transactions, track monthly spending, and maintain personal diary entries in a secure database. Implemented MySQL for efficient data storage and retrieval. Designed an interactive and user-friendly UI with KivyMD components for smooth navigation and modern appearance.

- Developed secure login authentication using Email OTP verification through SMTP protocol
- Implemented OTP-based user verification system for enhanced account security and privacy
- Integrated SMTP email service to send real-time One-Time Passwords (OTP) during user login

Personal Networking Portfolio

Personal Portfolio Website

- Developed a personal portfolio website to showcase technical skills, networking knowledge, cybersecurity interests, and projects using HTML, CSS, and JavaScript. Designed a responsive and modern user interface with smooth navigation, interactive sections, social media integration, and resume download functionality.

NETWORKING PROJECT

Autonomous Self-Healing Network Defense System (Ongoing Project)

Tech Stack:

- Python, FastAPI, Scapy, MySQL, Grafana, Prometheus, Linux, Docker

Description:

- Developing a real-time network monitoring and security system capable of packet analysis, threat detection, automated firewall protection, and self-healing service recovery. Implemented live traffic visualization, anomaly detection, and automated alerts using Python, Scapy, FastAPI, and Linux networking tools.

CORE COMPETENCIES

- Network troubleshooting and fault isolation
- IP addressing, subnetting, and CIDR
- Network documentation and topology diagramming
- Team collaboration and communication
- Fast learner with ability to work under pressure

ACHIEVEMENTS & ACTIVITIES

- Artificial Intelligence-Foundation
- Cisco IOT Foundation
- RPA Foundation
- Cloud Computing-Foundation
- Cisco Cyber Security

LANGUAGES

- Tamil – Native
- English – Professional Proficiency
